DAIRY CATTLE TESTING

1. The Maryland State Fair and Agricultural Society, Inc. ("State Fair") will have the authority to inspect all animals to determine if violations of State Fair Rules or the Code of Show Ring Ethics have occurred including:
 - a. an ultrasound examination of the udder, prior to milkout
 - b. the collection and testing of any of the animal's bodily fluids and/or
 - c. the use of any other technology that may be useful in determining if a violation has occurred in any animal based on placement, random selection, or suspect characteristics.
 - d. the State Fair Board Chairman ("Board Chairman") may, at any time, require the delivery to them of any hypodermic syringes, needles, or other devices, swabs, cloths, or other materials, or samples or any medicines, preparations, or substances, whether in liquid or other form, in the possession or control of the exhibitor for the purpose of laboratory analysis.
2. If before an animal is shown the Board Chairman in his discretion reasonably believes that a violation will occur if an animal is shown, the Board Chairman along with the Dairy Cattle Show Superintendent and the General Manager will determine if a violation is likely to occur if the animal is shown. The exhibitor will then be informed that the showing of that animal may result in a violation of State Fair rules or the Code of Show Ring Ethics. If the exhibitor withdraws the entry, no violation will be deemed to have occurred.
3. Following the judging of the milking cow classes, the State Fair may perform such tests as it deems appropriate including ultrasounding the udders, prior to milkout, of the winning entry and a random number of other entrants.
4. If any violations appear to have occurred, the ultrasounding readings, milk sample analysis or other evidence and test reports, if any, will be submitted to the Board Chairman, the Dairy Cattle Show Superintendent and the General Manager.
